

Spring Progress Report: C7FIT

Rutger Farry
Brandon Lee
Michael Lee

12 May 2017

Overview

Expected delivery

June 2017

Recent progress

- Release functionally complete

Project purposes and goals

Purpose

- To create a fitness application centered around the Club Seven Fitness gym

Goals

- eBay Store
- Activity Tracker
- Trainer contact
- Embedded Youtube video
- Personal metrics

Schedule

Begin laying out base architecture for app, work on components

Deliver final app via App Store

Deliver MVP

Continue refining UI design, have some user-facing functions working

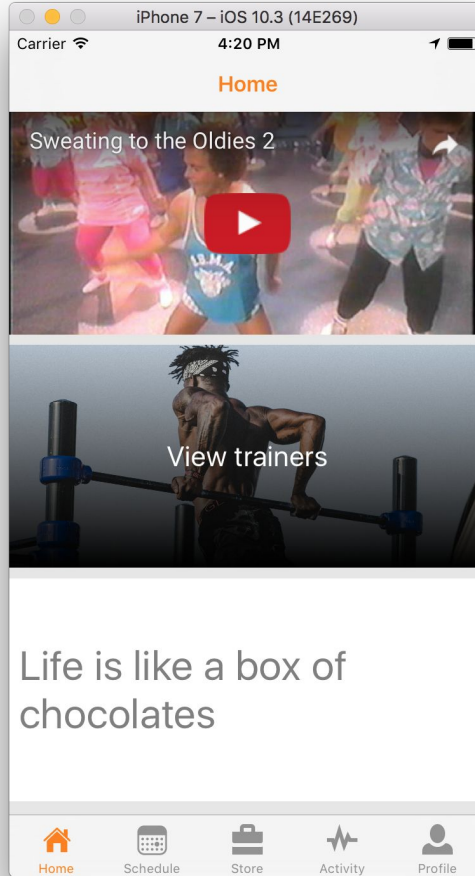

Continue refining MVP and adding stretch goals

State of the App

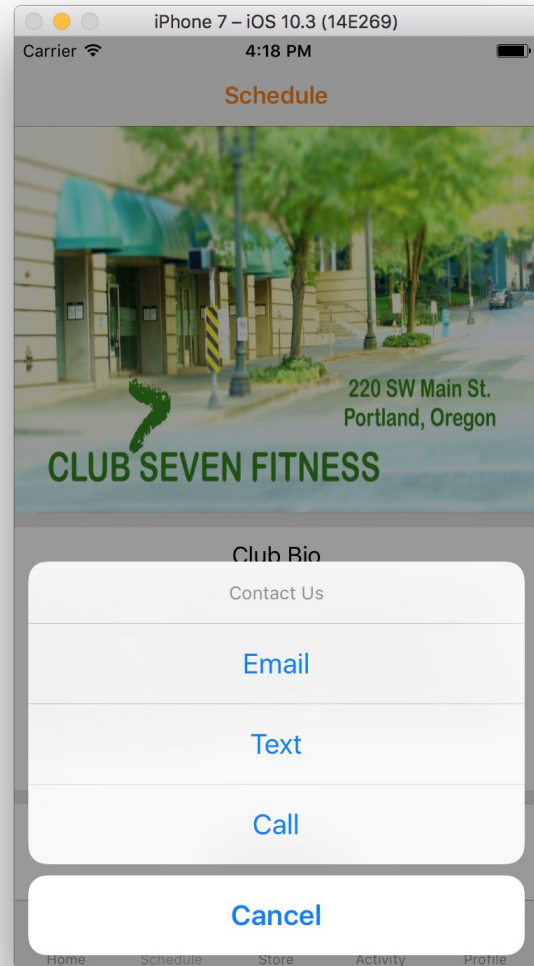

Home Screen

- Plays YouTube instructional videos the coach has chosen
- Contains a daily audio motivational message
- Shows info on available trainers

Schedule Screen

- Simple screen that allows the user to communicate with the gym
- Links to the Gym website
- Allows clients to contact gym personally through email, texts, or calls

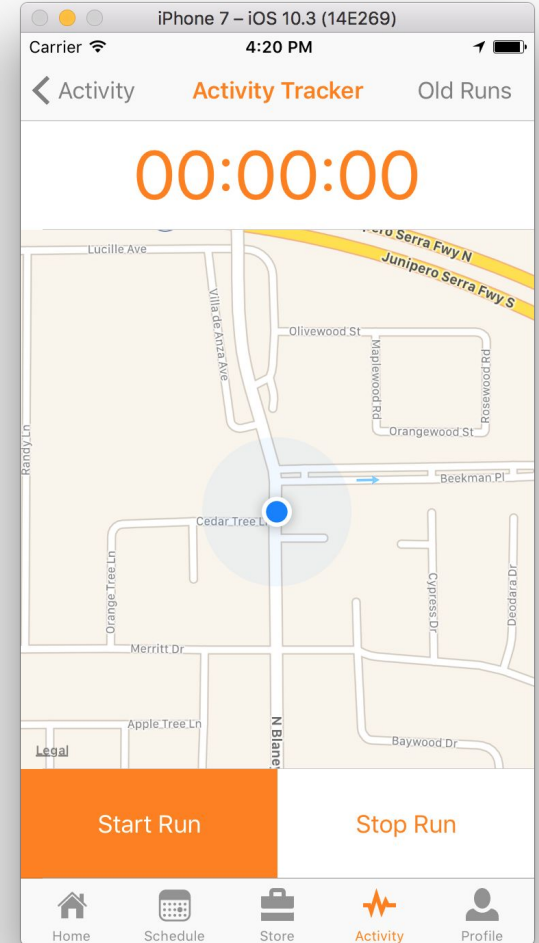

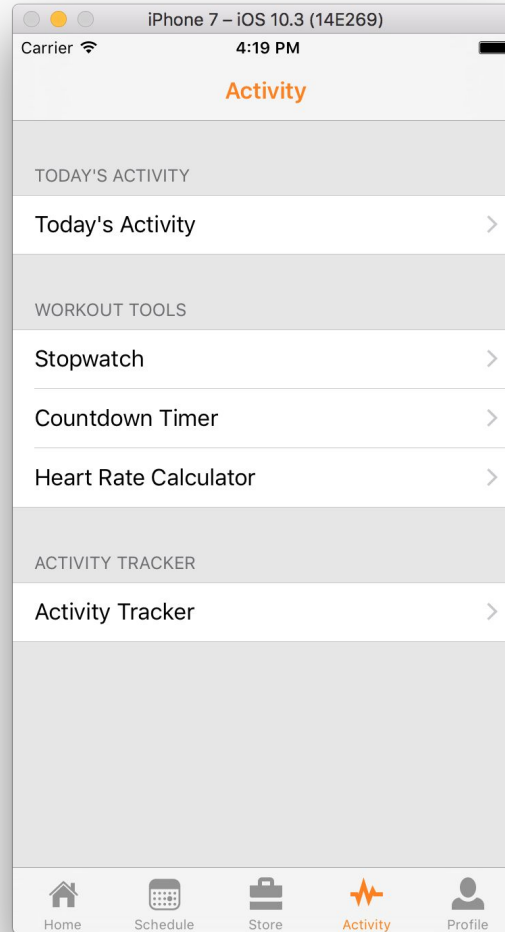

Store Screen

- Simple screen that allows the user to shop for fitness products
- Displays details and images of various items.
- Links to the eBay website

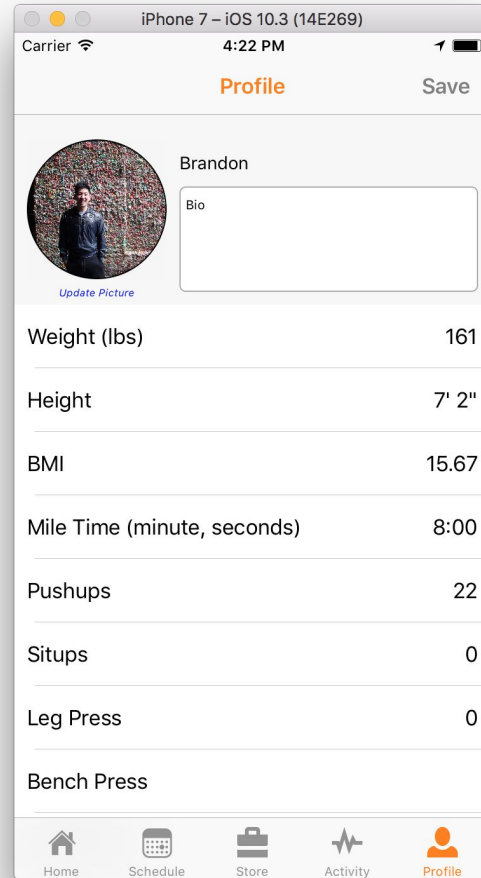

Activity Screen

- Utilizing HealthKit and MapKit to provide functionality to the user
- Workout tools to help clients
- Timer/stopwatch/Heart Rate Calculator
- Today's activity, shows the most recent exercise located in healthkit
- Activity Tracker follows the users on their runs

Profile Screen

- Utilizing Firebase and to provide functionality to the user
- Has typical profile functions, such as creating account, login, and data input and fetching.

What's next?

Attention areas

Building/testing eBay API client

- Large part of the app, needs to be well-tested and reliable
- Build on Apple's URLSession and JSON parser to create easy-to-use library

Attention areas

- Add deep linking
- Get trainer info from Firebase
- Prepare for App Store

Remaining Goals

1. Update client assets
2. Engineering Expo
3. Final meetings with client
4. Deliver app to the App Store

Expo Pitch

Code Walkthrough/Demo
